

TRACcess[®] Key Holding Devices

Improve Your ATM Service Level

TRACcess provides a secure, traceable and instant access method to ATM facilities for service or cash replenishment.

This is achieved without modifying any locks, by storing ATM facility keys securely locally in a high security vault, mounted into brick or concrete.

This ATM can be accessed in or out-of-hours via a smartphone app, which can be recorded and monitored, providing efficient access and reporting for your business.

- Eradicate key management costs
- Facilitate out-of-hour service access to ATMs
- Improve ATM service levels and operating efficiencies
- Live auditable record of ATM facilities access
- Improve security by storing keys to LPS1175: Issue 7, Security Rating 2

LPS 1175: Issue 7
Cert/LPCB ref. 1062d
