

Portable KeySafe™

£39.54

Product Code: 001406

Overview

This Supra Portable Temporary Outdoor Key Safe provides convenient temporary key storage for multiple keys, as well as doubling as a heavy duty padlock.

This unique design provides multiple levels of security in one. Ideal for use for company premises, this padlock doubles as secure key storage. This means that any member of staff can gain access to gates, and ultimately office doors once given the code, eliminating the need for multiple key holders. The code can be changed quickly and as regularly as necessary in order to maintain security periodically or with staff turnover.

This short term key safe can be used as an interim solution to help curb bed blocking in hospitals. The temporary keysafe can make it possible to create a temporary care plan, before a more permanent solution can be implemented.

This KeySafe is designed for short term use in conjunction with alarm systems, CCTV and other security measures. For high level security, you may wish to consider the C500 Police Accredited Key Box

Looking for spares?

Protect from the elements with the portable key safe weather cover

Order through our secure payment gateway before 3:45pm for free next working day delivery.

Features

**Not including Shackle

- Hangs easily on any door knob, gate, fence, railing or pipe. You simply enter the code, remove the lid, lift the shackle and hang
- Holds up to 2 Yale type keys
- Over 1000 possible combinations when using the recommended 5 – 7 digits. You can change your code as many times as you want to maintain security
- Includes a black neoprene weather cover to protect it from the elements which, as an added security feature, acts to shield the KeySafe fascia from view
