

Indigo KeySafe™

Product Code: 001524

Overview

This KeySafe has a Snap Shut locking mechanism, which permits locking without using the lockbox key. Using the patented secure Title key locking mechanism this product can be uniquely customized per customer. It attaches easily to the window of any vehicle and proves invaluable for car dealerships, car rental companies, long term parking and service centers.

We recommend this product should only be used in conjunction with fully secured sites that meet your insurance providers' standards. Where sites are fully secure and comply with insurer's requirements, nightly removal of the keys is not necessary.

These boxes can be used on non-secure sites as long as the keys are removed at night and we recommend that the key boxes are left open.

Features

- Made out of a special aerospace aluminium alloy, which makes it lightweight
- A Dry Lock Lid shields the lock mechanism from corrosion due to dirt and moisture while the padded foam back prevents damage to the vehicle window
- Attaches easily to the window of any vehicle with a stainless steel hanger which is securely riveted to the key box
- No tools are needed to install the Indigo: just slip it over the window and roll up the window again to securely lock it
- The permanent mount version is mounted to the wall with the appropriate plugs and screws (not included)
