

P500 Police Accredited KeySafe™ - To Fit Grade 2 Alarm System

£95.94

Product Code: 0020462

Overview

The Supra P500 Key Safe was designed after extensive consultation with users. It has Police accreditation for being tested on outside walls. This accreditation is recognised by Secured By Design, as well as by leading home insurance companies.

Alongside the C500, it is also the only mechanical key safe box to achieve LPS 1175 : Issue 6, Security Rating 1, LPCB certificate number 1062a (Find out more) security rating which means it has undergone a series of rigorous and demanding tests devised by security experts (The LPCB) who concluded that, when installed as directed, the Supra P500 is as attack resistant as a domestic front door.

Please note to maintain the Police Accreditation the P500 must be installed into brick or dense concrete, not breeze block or mortar. When installed and used as intended, this key safe is covered by a 2 year guarantee against manufacturing faults.

This key safe is supplied complete with a weather cover and 4 x wall tapping screws that do not require wall plugs.

This Keysafe can be fitted onto the wall yourself. Alternatively, the Alarmed P500 can be installed into a Grade 2 Alarm system, must be undertaken by a professional and is not a DIY alarm kit or standalone alarm.

If installing yourself, you may need a T30 Screwdriver and 5mm Drill Bit

Order through our secure payment gateway before 3:45pm for free next working day delivery.

Features

- Weight: 1,900g
- Optional alarm hookup. This is a Grade 2 alarm which MUST be fitted by a professional alarm installer.
- The P500 is Police accredited, tested to LPS 1175: Issue 6, Security Rating 1: The same as a domestic front door!
- The large 81.3x50.8mm vault of the P500 allows you to store between 1 and 6 keys depending on key type and length (5-6 Yale type or 2-5 Chubb style keys)
- It has an integral hook to ensure easy access to keys (65mm from hook to base)
- It takes just 4 simple steps to access the keys stored inside a P500
- There are over 4,000 possible combinations
- You can change your code as many times as you want to maintain security
- It is constructed from Zinc Alloy, and integrates a strong zinc alloy insert, which protects from both prying and forced entry, making it extremely attack resistant

- It is rust and water resistant and can be used in temperatures from - 32°C to 68°C.
- Includes a rigid black weather cover to protect it from the elements which, as an added security feature, acts to shield the key safe fascia from view
- Your P500 will come with a set of our recommended fixings which must be used to maintain the Police Accreditation. These are self tapping masonry screws that fix into brick or concrete without the need for rawl plugs
- The P500 is supplied complete with an anti-tamper code cover, meaning that your staff, contractors and/or tenants cannot change the code. Please note this is supplied with both a cross head screw and special anti tamper pin torx screw. To use this screw, you'll need the corresponding tool (Pin T15)

Approximate Measurements

	Height	Width	Depth
External*	149.35mm (5 7/8")	81.03mm (3 3/16")	63.5mm (2 1/2")
