

Torx Driver Bit for C500 and P500 KeySafe

£1.20

Product Code: KTX30

Overview

T30 Screwdriver insert for use with a 1/4" hex magnetic screwdriver. Please ONLY use this tool in a hand driver in order to properly torque the C500's bolts for maximum security.

Used to install supplied fixings for the Supra C500 and Supra P500 KeySafe[®], the Torx head is specially chosen for its torque rating. With 12 points of contact, torx screws can be tightened by hand or by electric drill quickly and tightly without risk of shearing or rounding.
