

TRACcess BT Smart – Commercial Electronic Key Safe

Product Code: TRAC-Vault BT Smart L

Overview

TRAC-Vault BT Smart provides the only universal means of achieving a secure, traceable and instant method to access facilities. This is achieved without changing or modifying any locks or doors, by storing keys, fobs or cards securely on-site in the TRAC-Vault electronic key safe.

The TRAC-Vault electric key safe is opened via eKEY – a smartphone App downloadable for each key holder from any App store. Each time TRAC-Vault is opened a record is sent to the TRACcess Manager server, providing a full audit trail of key holder access.
