

# MECHANICAL KEYSAFES FOR INDEPENDENT LIVING

THE  
**Key Safe**  
COMPANY

Trust. Quality. Passion.

## ABOUT US

The Key Safe Company was founded in 1995, and was the first to introduce key safes to the UK. We have longstanding links with Supra in the USA, who invented the key safe 60 years ago. To this day, we remain the largest supplier in the UK, with over 2.5 million units fitted.

Our C500 KeySafe™ is the only key safe approved by the police, tested to the same standard as an external door. Across Europe, it has become a critical part of care packages and revolutionised how care is delivered.

We don't just supply the product either. The Key Safe Company works with local health and social care providers to provide training. We help staff understand when a key safe is needed as part of a care package. We also instruct installers on how to fit a key safe correctly.

Our product quality, expertise, and close working partnerships have made us the market leader. We are the preferred supplier to over 86% of Local Authorities.

## APPLICATIONS

- Guarantees immediate access for home healthcare services, nurses, paramedics, emergency services, friends and family
- An essential part of any lifeline or pendant alarm service
- Backup for lost or forgotten keys

## ADVANTAGES

- Functions during power cuts – no batteries or mains wiring required
- Reduces the time needed to run for keys
- National installation service available
- Guaranteed for 2 years

# SUPRA C500 KEYSAFE™

The UK's only Police  
Approved Key safe  
Tested on Outside Walls.

The C500 KeySafe™ has been designed following extensive consultation with users and is our newest innovation in mechanical key safes. The security of the C500 is the highest level ever awarded to a mechanical key safe in the UK, achieving LPS1175 level 1 accreditation, equal to a front door of the same standard. As a result of this security rating, the product has achieved Police approval through the Secured by Design initiative.

Secured by Design

Official Police Security Initiative

An addition of a stainless steel plate around the easy to use buttons are fingerprint resistant.

Approved by the Association of British Insurers and Association of Insurance Surveyors, the C500 will not invalidate your home insurance. The Supra C500 KeySafe™ is the first choice of over 86% of Local Authorities, the discreet mechanical device is a trusted way of externally storing up to 6 keys. Easily installed using a masonry fitting kit, the C500 is an easy to use, durable, weather proof and enables over 4000 possible combinations.

To maintain its security certification, the C500 KeySafe™ must be mounted according to instructions using the screws provided.

**Part No:** 409-COV

**Description:** Permanent KeySafe™

Weather Cover

(included)

**Part No:** ATP01

**Description:** KeySafe Anti Tamper Plate (additional cost)

## J5 KEYSAFE™

The J5 is our innovative take on the classic Permanent KeySafe™.

It allows immediate and temporary access to homes, void properties and holiday lets, and could be an answer to the NHS issue of Bed Blocking. It allows patients to be discharged and released in confidence that access can be gained by the Health and Social Care Community.

The J5 easily fits between the door and the frame for temporary key holding solutions, negating the need for screws or power tools. The key safe is kept in place by closing the door and can be easily relocated when required.

The hanging bracket supplied with the J5 KeySafe™ is recommended for wooden doors. An additional bracket is available for use with PVCu doors. The discreet mechanical device is a trusted way of externally storing up to 5 keys. The J5 KeySafe™ is easy to use, durable, weather proof and enables over 1000 possible combinations.

### TECHNICAL SPECIFICATIONS

#### Dimensions Exterior (HxWxD):

4.29" x 2.60" x 2.20"  
109mm x 66mm x 57mm

#### Dimensions Interior (HxWxD):

2.76" x 1.54" x 0.98"  
70mm x 39mm x 25mm

#### Weight:

900g

#### Possible Combinations:

1024 combinations

#### Key Storage:

4-5 Yale type keys  
1-2 Chubb type keys

### ORDERING INFORMATION

**Description:** J5 PVCu Door Bracket (additional cost)

## PORTABLE KEYSAFE™

The Portable KeySafe™ is an alternative temporary key safe for use when a J5 is unsuitable.

It allows immediate and temporary access to homes and could be an answer to the NHS issue of Bed Blocking, allowing patients to be discharged and released in confidence that access can be gained by the Health and Social Care Community.

The design secures to a door knob, fence or grab rail for temporary key holding solutions negating the need for screws or power tools. This key safe can easily be relocated when required.

The discreet mechanical device is a trusted way of externally storing up to 2 keys. The Portable KeySafe™ is easy to use, durable, weather proof and enables over 1000 possible combinations.

### TECHNICAL SPECIFICATIONS

**Dimensions Exterior (HxWxD):**

3.77" x 2.48" x 1.49"

96mm x 63mm x 38mm

**Dimensions Interior (HxWxD):**

2.59" x 1.53" x 0.47"
