

IP54 Document Cabinet

£177.54

Product Code: IPDCABINET01

Overview

This fire document cabinet is the easy and secure way to comply with the Regulatory Reform (Fire Safety) Order 2005. As per these regulations, your Fire Safety Officer or responsible person must make all 'live' fire risk assessment documents readily available and stored correctly.

Most importantly, this fire cabinet ensures that your potentially life saving documents are ready, available and usable when you need them most.

With a solid die-cast construction and anti-tamper TouchPoint code lock, this IP54 rated document cabinet can be used to store A4 folders, ring binders and document wallets, protecting them from dust and water ingress. Internal fixing further protects from tampering, while the lipped construction shields from weather, dust and would-be vandals.

Due to its IP54 rating, this weather resistant lock box can be used inside or out, and the unique mechanical code mechanism will not be damaged by the weather.

Features

- Solid die cast body with a ten-digit changeable combination and a clutch mechanism to turn the cam
- Requires no battery or mains power
- Internal or external use
- Push button TouchPoint code lock
- Dust and shower resistant to IP54
- Fits A4 Folders and ring binders
- Helps comply with 2006 Fire Reforms
