

S7 Big Box KeySafe™

£58.46

Product Code: 001267(EU)

Overview

This Supra S7 Big Box KeySafe provides convenient key storage for multiple keys and/or access cards.

This outdoor key safe is designed specifically for the office. Its heavy duty design is created to allow secure storage for proximity access cards. Many users utilise this box internally in order to keep company credit cards available to staff on request (and approval!)

Supplied with a weather resistant cover, this key box is also perfect for external use. Despite its large size, when installed discretely with its neoprene cover, it is easily overlooked by the opportunist.

This Supra KeySafe is designed for use in conjunction with alarm systems, locked gates and other security measures. For high level security, you may wish to consider the C500 Police Accredited Key Safe

Looking for spares?

Installation of the S7 key card box requires a 4mm masonry drill bit. You can protect from tampering with the key box code cover and protect from the elements with the weather resistant cover

Order through our secure payment gateway before 3:45pm for free next working day delivery.

Features

- Weight: 1,700g
